

## **Ecosine 400-480 VAC 50Hz Economy Passive Harmonic Filters**

- Economy line of passive harmonic filters for THDi <10%</li>
- Help to comply with EN 61000-3-12, IEEE-519 and other PQ standards
- Support an efficient utilization of electrical system capacity
- Ideal for motor drives with 6-pulse rectifier front-end
- Suitable for diode and thyristor (SCR) rectifiers applications

### **Technical Specifications**

Nominal operating voltage	3x380 to 500 VAC ±10%					
Overload capability	1.6x rated current for 1 minute, once per hour					
Operating frequency	50Hz ±1 Hz (FN 3416)					
Total harmonic current distortion THDi*	<10% @ rated power (with DC-Link choke) <15% @ rated power (without DC-Link choke)					
Total demand distortion TDD	According to IEEE-519					
Nominal motor drive input power rating	4 to 160 kW					
High potential test voltage	P -> E 2500 VAC (2 sec)					
Earthing system	TN, TT, IT					
Efficiency	>98% @ nominal line voltage and power					
Temperature range (operation and storage)	-25°C to +45°C fully operational +45°C to +70°C derated operation*** -25°C to +70°C transport and storage					
Cooling	Internal fan cooling, unregulated					
Protection category	IP 20					
Flammability corresponding to	UL 94 V-0					
Design corresponding to	UL 508, EN 61558-2-20, CE (LVD2006/95/EC)					
SCCR**	100 kA					

- \* System requirements: THVD <2%, line voltage unbalance <1%
  Note: performance specifications in this datasheet refer to six-pulse diode rectifiers.
  SCR rectifier front-end will produce different results, depending upon the firing angle of the thyristors.
- \*\* External UL-rated fuses required.
- \*\*\* Iderated = Inominal\*SQRT(70°C-Tamb)/25°C

### Approvals & Compliances

#### **Features and Benefits**

FN3416 (50 Hz) models of the ECOsine product family represent the very compact economy line with a THID performance of >10% (with Ldc).

They are ideal for non-linear three-phase equipment with B6 rectifier front-end that do not require the industry leading <5% THID performance provided by Schaffner Ecosine Evo series.

The performance is still sufficient to comply with EN 61000-3-12 or with IEEE-519 for Isc/IL <50. Schaffner Ecosine filters help to unburden the electrical infrastructure from excess loading and heat caused by current harmonics, and therefore support a better utilization of electric system capacity.

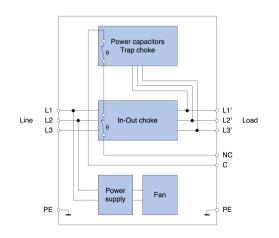

Lower harmonics also reduce the risk of system resonances and potential downtime of sensitive electronic equipment.

FN3416/18 filters upgrade standard motor drives to low-harmonic drives quickly and easily.

### **Typical Applications**

- Three-phase power conversion equipment with front-end six-pulse rectifier (diode or SCR)
- Motor drives, like those used e.g. in pump and fan applications
- Battery chargers, incl. DC fast chargers for e-cars

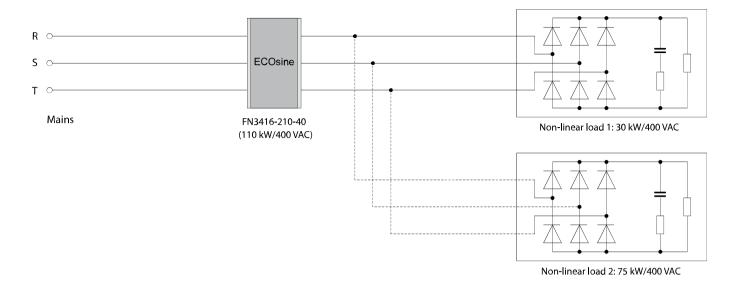

### Typical electrical schematic

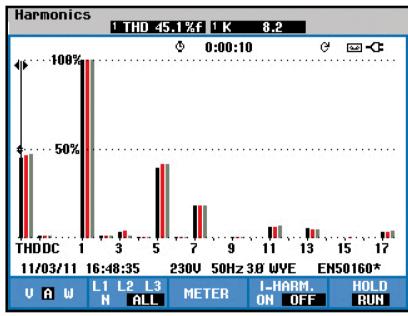

Ecosine Economy Schaffner Group DATA SHEET 22. Jan 2025

### **Filter Application**

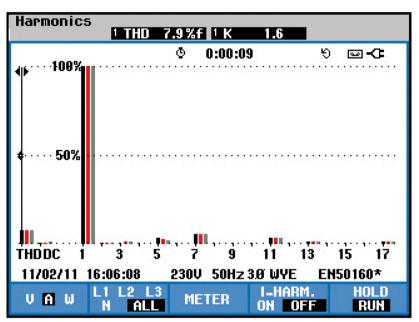

ECOsine filters are best installed directly at the input of 6-pulse rectifiers. It is possible to connect several non-linear loads (e.g. motor drives) in parallel. In this case the rating of the filter must match the sum of the power ratings of drives connected to it. The use of a (built-in) DC-link choke is recommended for best harmonics mitigation performance. If the expected input power exceeds the rating of the largest available filter, and a custom solution is not desired, then two or more filters can be wired in parallel. In this mode of operation, it is recommended to use filters with equal power ratings to ensure proper current sharing.

### **Typical Filter Performance**

Motor drive with Ldc, with ECOsine FN 3416

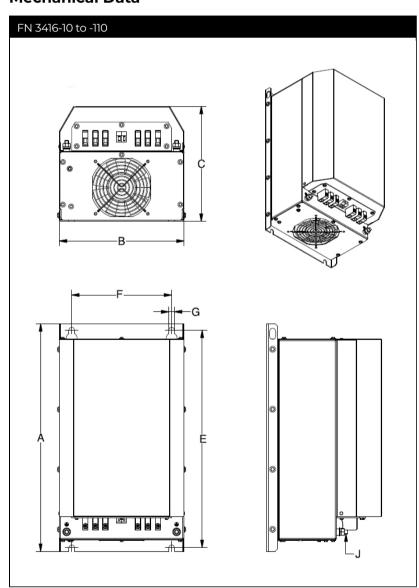

### **Filter Selection Table**

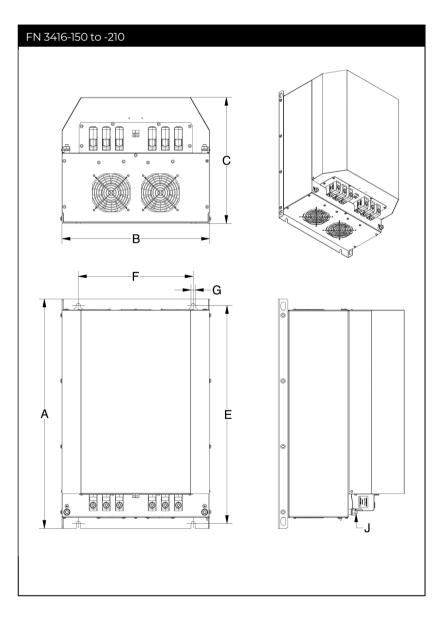

Filter*	Rated load power @ 400 VAC/50 Hz	Rated load power @ 500 VAC/50 Hz	Power loss** @ 25°C/50 Hz	Input /output connections		Weight
	[kW]	[kW]	[ <b>W</b> ]			[kg]
FN 3416-10-44	4	5.5	63	-44		10
FN 3416-13-44	5.5	7.5	82	-44		10
FN 3416-16-44	7.5	11	105	-44		15
FN 3416-24-33	11	15	153	-33		20
FN 3416-32-33	15	18.5	294	-33		22
FN 3416-38-33	18.5	22	256	-33		25
FN 3416-45-33	22	30	306	-33		29
FN 3416-60-34	30	37	408	-34		37
FN 3416-75-34	37	45	410	-34		43
FN 3416-90-35	45	55	493	-35		47
FN 3416-110-35	55	75	546	-35		50
FN 3416-150-40	75	90	784	-40		86
FN 3416-180-40	90	110	817	-40		92
FN 3416-210-40	110	132	887	-40		100
FN 3416-260-99	132	160	947		-99	125
FN 3416-320-99	160	200	988		-99	135

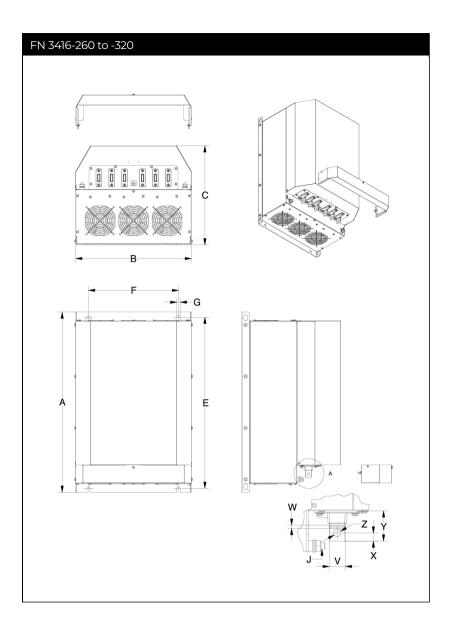

Filter to be selected by system voltage and load (motor drive) power. Note: the harmonic filter will reduce RMS input current.
 Therefore, filter selection by current rating, as it is common for EMC/EMI filters, is not recommended.

 \*\* Calculated power loss at rated load power.
